

АНАЛИЗАТОР УГЛЕРОДА / СЕРЫ

ELEMENTRAC CS-r

For the safe, precise and reliable elemental analysis of carbon (C) and sulfur (S) in predominantly organic matrices such as soils, waste, wood, oil, coal and coke, ELTRA offers the combustion analyzer ELEMENTRAC CS-r with IR detection.

The CS-r with up to 4 infrared cells is designed for carbon and sulfur measurement over a very wide concentration range. It uses a horizontal resistance furnace with ceramic tube, which operates in a range from 600 °C to 1550 °C.

The CS-r elemental analyzer meets or exceeds the requirements of all common ASTM, DIN, EN or ISO standards for elemental analysis.

АНАЛИЗАТОР УГЛЕРОДА / СЕРЫ ELEMENTRAC CS- R

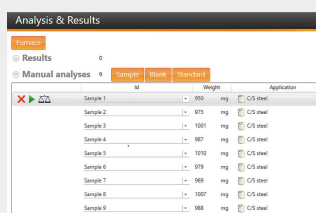

- | Fast, simultaneous measurement of carbon and sulfur
- | High sample weight possible
- | Optimized (low blank) sample port
- | IR path made of solid gold for extended lifetime
- | Wide measuring range from 20 ppm to 100%

АНАЛИЗАТОР УГЛЕРОДА / СЕРЫ ELEMENTRAC CS-R

OPERATION AND ANALYSIS PROCESS

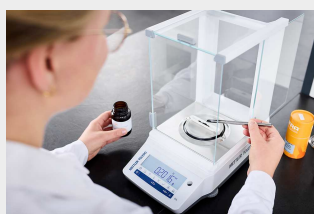

The ELEMENTRAC CS-r analyzer determines the elements carbon and sulfur by combustion of the sample in an oxygen stream and subsequent measurement of the combustion gases CO₂, SO₂ and H₂O in selective infrared measuring cells. A high sample weight of up to 500 mg ensures excellent reproducibility of the elemental analysis results, even for heterogeneous samples.

The high combustion temperatures and electronic monitoring of the oxygen flow allow complete oxidation of the sample and help to avoid too low results even with challenging materials like cement. Regardless of the selected configuration (carbon – sulfur - carbon and sulfur), operation is identical in all analyzer versions.

Step 1: Logging the sample into the ELEMENTS software

The sample ID is logged into the software and the weight is automatically transferred (see step 2).

Step 2: Weighing and adding of accelerators

Volumes of 50 mg to 500 mg are typical for elemental analysis of carbon and sulfur. The sample is directly applied to a carrier (ceramic or Inconel boat) and analyzed without addition of accelerators.

Step 3: Analysis

The sample is placed in front of the furnace opening and the measurement is started in the software. Subsequently, the shutter opens, and the material can be introduced into the hot furnace. At the same time, the ELEMENTS software continuously records measured values during combustion. Closing the furnace during the measurement is optional and can improve reproducibility.

Step 4: Data output and export

60 to 240 seconds after the analysis has started, the measured carbon and sulfur concentrations are available for export as a report or via LIMS. Depending on the selected configuration, carbon and sulfur values are available for the individual sample.

SOLUTIONS & OPTIONS IN DETAIL

The ELEMENTRAC CS-r analyzer comes with various solutions for reliable and precise carbon and sulfur analysis.

Included: Two Anhydron Columns

For reliable carbon and sulfur analysis, the combustion gases must be freed from water vapor prior to IR detection. The CS-r elemental analyzer is equipped with two drying columns filled with magnesium perchlorate to reliably prevent absorption effects in large sample volumes. In the case of TOC analysis, a chemical tube can also be used as a halogen trap to reliably absorb acid residues and halogens.

Included: Low blank sample port

The ELEMENTRAC CS-r and CHS-r analyzer series ensures safe and precise elemental analysis even of samples with low carbon content in the resistance furnace. Due to the optimized geometry of the sample port with reduced diameter, as well as an oxygen purge at the sample inlet, the CO₂ blank value of the atmosphere during sample introduction is drastically reduced, thus enabling reliable carbon analysis in the low measuring range.

Option: Second Furnace (ELTRA Dual Furnace Concept)

The CS-r elemental analyzer can be connected in any configuration to an additional furnace without detectors. This principle, known from the ELEMENTRAC CS-d, allows fast fractionated analysis by applying different temperatures and provides

safety for high sample throughput.

Option: Monitor Holder

To make the most of available laboratory space, the ELEMENTRAC CS-r analyzer offers various operating options:

- | External monitor and keyboard
- | Monitor holder, wireless keyboard
- | Operation via touchscreen

Option: TIC Module

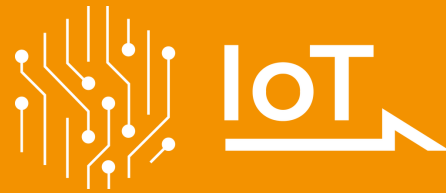

Depending on the sample, carbon can also be present in the two different fractions TOC (Total Organic Carbon) or TIC (Total Inorganic Carbon). The CS-r elemental analyzer can be combined with ELTRA's TIC module to determine the TIC content via acidification. This combination enables reliable, direct TIC analysis in soils, building materials and other products in compliance with DIN EN 15936.

IOT - INTERNET OF THINGS

THE PLATFORM FOR REMOTE ACCESS TO YOUR DEVICES

All ELTRA analyzers seamlessly integrate with the Verder Scientific IoT platform, providing enhanced functionality, seamless connectivity, and additional benefits:

- | **Real-time Monitoring:** Gain insight into the status of your machines at any time thanks to immediate access to important data.
- | **Live Notifications:** Stay up to date on the status of your devices with instant notifications.
- | **Effortless Backup:** Whether you need to back up a single device or an entire fleet, back up your data effortlessly and minimize downtime.
- | **Automatic Software Updates:** Verder Scientific IoT keeps your device software up to date, optimizing performance and reliability.
- | **Access to Analyses Data:** ELTRA analyzers offer remote access to analysis data. This allows you to conveniently access important data while on the move.
- | **Autoloader Efficiency:** Get the most out of remote analysis preparation with our autoloader feature, which ensures uninterrupted operation and increased productivity for all instruments equipped with it.

Experience the power of the Verder Scientific IoT platform today and unlock the full potential of your ELTRA analyzers!

ПРОГРАММНОЕ ОБЕСПЕЧЕНИЕ ELEMENTS

The comprehensive Windows-based ELEMENTS software is an essential part of all ELEMENTRAC generation elemental analyzers.

A central window (analysis and results) is the starting point from which all functionalities required for the daily routine are easily accessible. From here it is possible to group and export analyzed samples, or register and analyze new ones. The user may call up various subordinate functionalities like application settings, calibration, diagnosis, or status.

ПРИНЦИП РАБОТЫ

In the elemental analyzer CS-r the sample is burnt in an oxygen atmosphere at temperatures up to 1,550 °C. The furnace temperature can be freely selected in steps of 1 °C. The combustion gasses (CO_2 , H_2O , SO_2) coming from the furnace and pass through a dust filter. After the water vapor is chemically absorbed, the dried CO_2 and SO_2 gas is detected in the additional infrared cells. Depending on the configuration, it is possible to combine up to four (for C, S analyzers) infrared cells with different sensitivities.

АНАЛИЗАТОР УГЛЕРОДА / СЕРЫ ELEMENTRAC CS-R

ХАРАКТЕРИСТИКИ

Измеряемые элементы	сера, углерод
Материал проб	органические материалы
Направление ввода пробы в печь	horizontal (resistance furnace)
Подача пробы в печь	керамические лодочки
Область применения	биология, медицина / фармацевтика, окружающая среда / переработка, сельское хозяйство, строительные материалы, угольная промышленность / энергетика, химическая промышленность / пластики
Печь	печь сопротивления с керамической трубкой, температура настраивается с шагом 1 °C максимум до 1550 °C
Принцип детектирования	метод инфракрасной абсорбции
Количество ИК кювет	1 - 4
Материал ИК кювет	золотые
Типичное время анализа	60 - 180 с
Требуемые реактивы	гидроксид натрия, перхлорат магния
Требуемый газ	кислород качества 99,5% или лучше (2 - 4 bar)
Требование к электропитанию	230В, 50/60Гц, максимальный ток 20А
Размеры (Ш x В x Г)	58 x 52 x 75 cm
Вес	~ 77 kg
Требуемое оборудование	ПК, монитор, весы (точность 0.0001г)
Опции	Контур управления

Медь, стружка, 25 г

90840

Кварцевый песок, 100 г

88400-0508

Steel wool

BOATS

90160

Disposable porcelain boats 86 x 13 x 10 mm, 1000 pieces

90153

Re-usable ceramic boats, premium, 58 x 22 x 14 mm, 500 pieces

88600-0011

Re-usable ceramic boats, 95 x 13 x 10 mm, 500 pieces

88400-0502 Re-usable inconel boat, 54 x 18 x 13.5 mm, 1 piece

88400-0503 Re-usable inconel boat, 54 x 18 x 9 mm, 1 piece

TOOLS FOR OPERATION: SPATULAS, TWEEZERS, TONGS AND OTHER

88400-0229 Пинцет (160 мм), скругленный, 1 штука

88400-0472 Пинцет (145 мм), прямой, 1 штука

88400-0475 Set with 6 spatula and 1 tweezers, for multiple weighing procedures

90145 Tongs for ceramic crucibles and boats, 220 mm, 1 piece

88600-0009 Screen glass with edge guard

88400-0499 Safety glasses

36216-2001 Combustion boat insertion stick, 1 piece

36218-2001 Combustion boat removing stick, 600 mm, 1 piece

TOOLS FOR STORAGE, TRANSPORTING AND WEIGHING

88400-0477 Weighing boat, 1 piece, for weighing and usage of granulates

TOOLS FOR MAINTENANCE

88400-0473 Powder funnel (plastics), 1 piece, for easy filling of chemical tubes

88400-0490 Rubber plug 29 x 35 x 30 mm, 1 piece, for sealing big glass tubes like 09090

71010 Brush, 16 mm, 1 piece, for cleaning balance from dust

88600-0026 Anhydrone filter tube, glass tube filled with Anhydrone 1)
